EDUCATION

Computer Science Engineering — AI Specialty | 2023 – Present

Your University Name, Algeria

- Third-year student specializing in Artificial Intelligence
- Relevant coursework: Machine Learning, Deep Learning, Cybersecurity, Software Engineering, Algorithms

Baccalaureate Degree | 2023

High School, Algeria

- Graduated with a score of 14.31/20

CERTIFICATIONS

- ✓ **Advanced Learning Algorithms** — DeepLearning.AI & Stanford University — Coursera (Dec 2025)
- ✓ **Supervised Machine Learning: Regression & Classification** — DeepLearning.AI & Stanford University — Coursera (Sep 2025)
- ✓ **Modern JavaScript and Software Front-End Development** — Udemy (11 hrs) (Jan 2025)
- ✓ **The Java Learning Guide** — Udemy (9 hrs) (Apr 2025)

ACHIEVEMENTS & COMPETITIONS

🏆 **Hackathon Winner — AI24DAY (2nd Edition)** | 2025

AI House – University of Guelma 8 May 1945 · in collaboration with TechGeeks & LabSTIC Laboratory

- Awarded Certificate of Appreciation for outstanding participation and performance
- Competed in an AI-focused hackathon hosted by University of Guelma alongside AI House and TechGeeks

TECHNICAL SKILLS

Programming Languages

Python	Intermediate
JavaScript / TypeScript	Intermediate
Java	Intermediate
C / C++	Intermediate

AI & Machine Learning

Supervised Learning (Regression, Classification)	Advanced
Advanced Learning Algorithms (Trees, Neural Nets)	Intermediate
TensorFlow / Scikit-learn	Intermediate

Web & Mobile Development

HTML / CSS / JavaScript / React	Advanced
---------------------------------	----------

Mobile App Development (Flutter / React Native)**Intermediate**

Node.js / REST APIs **Intermediate**

Cybersecurity

Network Security & Protocols **Intermediate**

Penetration Testing Fundamentals**Beginner–Intermediate**

Tools & Platforms

Git / GitHub **Advanced**

Linux / Bash **Intermediate**

VS Code / IntelliJ **Advanced**

ACADEMIC & PERSONAL PROJECTS

AI / Machine Learning Projects | 2024–2025

University & Personal

- Implemented regression and classification models from scratch as part of the Stanford ML specialization
- Developed neural network solutions for supervised learning problems

Web & Mobile Applications | 2023–2025

University & Personal

- Built multiple front-end web applications using React and JavaScript
- Developed mobile applications using cross-platform frameworks
- Participated in university software engineering projects as developer and team lead

LANGUAGES

Arabic: Native | **French:** Fluent | **English:** Professional Working Proficiency

INTERESTS

Artificial Intelligence · Cybersecurity · Open Source Development · Competitive Programming · Hackathons
